

The candidate's name has been changed to Candidate for the purpose of this letter.

Dear Admissions Committee,

I wholeheartedly recommend our distinguished student, Candidate, for admission to the Master's program in Chemistry at Sorbonne University. I have had the pleasure of knowing Candidate for the past three years as his professor in several challenging courses including Organic Chemistry, Analytical Chemistry, and Physical Chemistry.

Candidate has consistently demonstrated a keen intellect, genuine curiosity, and an impressive aptitude for the sciences throughout his academic journey. His grasp of complex chemical concepts is exemplary, and he has skilfully applied theoretical knowledge to practical problems, particularly during his remarkable research project on the synthesis and applications of novel organic compounds, which was published by the university's Chemistry Society's journal.

Academically, Candidate has excelled beyond expectations, maintaining a first-class average throughout his studies, even receiving the Chemistry Department's Academic Excellence Award in the last academic year. Furthermore, these skills are complemented by his active participation in lab sessions, where his attention to detail and innovative approach to solving experimental problems were evident.

In addition to his academic achievements, Candidate has completed internships with notable chemical firms, including a summer placement at GlaxoSmithKline. Here, he not only honed his practical skills and deepened his understanding of pharmaceutical chemistry but also demonstrated strong teamwork and leadership capabilities by leading a small group in a project aimed at developing more sustainable production processes. This experience has significantly bolstered his practical understanding of chemical applications in industry and research.

Beyond the classroom and laboratory, Candidate is a valued member of our university community. He has contributed positively to campus life through his involvement in sports and martial arts. As an enthusiastic member of the university basketball team, he has shown commendable team spirit, leadership, and resilience. Similarly, in kickboxing, he has demonstrated discipline, strength, and a high level of fitness, regularly participating in training sessions and university competitions. These activities underscore his commitment to excellence and his ability to work in a team.

Candidate's ambition to pursue a Master's in Chemistry is driven by his desire to engage in cutting-edge research. I am confident that his dedication, coupled with the rich academic and cultural environment at Sorbonne, will propel him to greater heights.

Please feel free to contact me if you need any further information.

Yours sincerely,
