The purpose of this report is to provide students with overall information about the application procedure to this specific university. In case of seeking more specific requirements, individual research is necessary.

ABOUT

Tsinghua University in Beijing, China, founded in 1911, offers various programs primarily in Chinese, with selected English-taught master's programs. The international student body, from 100+ countries, is mostly from Asia. Undergraduates make up 41%, master's students 29%, and doctoral students 9%.

INTERESTING FACT

Tsinghua University is often referred to as the "MIT of China." This comparison highlights its reputation as a leading institution for science, technology, engineering, and mathematics (STEM) disciplines, like the Massachusetts Institute of Technology (MIT) in the United States. Tsinghua has played a crucial role in advancing technological research and innovation in China.
