

For the purpose of this essay the name of the candidate was replaced with “Candidate”.

Dear Admission Committee,

I am writing to provide my endorsement for Candidate in support of their application for the MSc Economics at the University of Warwick. As Candidate's academic professor and bachelor's thesis supervisor, I have had the privilege of observing their academic growth and intellectual development closely over the past years.

Candidate is an exceptional student, possessing a rare combination of intellectual curiosity, dedication, and adaptation capability. This was particularly clear to me during my supervision for his bachelor thesis, in which he was forced to tackle various unexpected issues and problems and did so extremely well. It is his ability to adapt to changing and unknown circumstances that stood out the most.

Additionally, his overall performance on his thesis, as well as on the subjects which I had the pleasure of teaching was to the highest standard. His thesis titled “*Paris Agreement: Assessing the Costs and Benefits of Climate Change Mitigation Policies*” made the list of top 10 best academic papers of that year. By choosing this topic, Candidate not only had to tackle various statistical and data-related problems, but also connect those to the topic of climate change, which was also an unknown territory for Candidate. With slight guidance from my side, he found valuable insights from the data to finally judge the treaty as unsuccessful.

Moreover, outside of his bachelor thesis, Candidate actively engaged in class discussions and consistently contributed valuable insights that enriched the learning experience for his cohort. His contributions and constant curiosity led him to scoring in the top 5% of the entire year for my subject, Microeconomics, as well as various others such as: International Economics, Applied Statistics, and The Introduction to Java Programming.

Thus, I have all the confidence in Candidate's ability to excel in MSc in Economics and make meaningful contributions to the academic community at the University of Warwick.

Please feel free to contact me if you require any further information.

Sincerely,

Candidate's Professor
