

STUDY ABROAD GUIDE TO ARCHITECTURE

Guide to Architecture Abroad

ARCHITECTURE IN ENGLISH

The biggest barrier in studying Architecture abroad is finding an accredited university that offers the course in an accessible language- English.

We have done the research for you to find universities offering Architecture in English.

WARNING!

Each university/country may require a portfolio; prepare it in advance.

ALL UK Universities

UCAT

ALL Irish Universities

N/A

ALL Australian and US Universities

SAT

Politecnico di Milano (Milan)

Admission test

University of Pécs (Hungary)

N/A

Istanbul Medipol University (Turkey)

Equivalent high school diploma

The Oslo School of Architecture and Design (Norway)

Admission test

Cornell University (USA)

Portfolio

Best Architecture Schools in Europe:

- Politecnico di Milano
- Technical University of Catalonia
- Delft University of Technology
- University College London
- Swiss Federal Institute of Technology Zurich

*At the Technical University of Catalonia, Architecture programs offer bilingual subjects (Spanish and English). *

THINGS TO CONSIDER

These are the things you should keep in mind when choosing to study Architecture abroad.

1

Is the whole degree in English? Almost all of them; it's worth noting that universities in Spain typically offer subjects in both English and Spanish.

2

Is the degree widely recognised? You must be certain that you can practice architecture in a country you deem to work in, before applying to the course.

3

What about the finances? In general terms, architecture adheres to standardized ranges for bachelor's degrees; however, many students choose to go to Italy due to the low cost of tuition fees and living expenses.

OUR TOP PICKS - COUNTRY EDITION

As much as there is variety of options, our three top picks encompass globally recognised universities with full English-taught degrees and high level of satisfaction.

1

Italy

Studying architecture in Italy presents a unique experience for prospective students. Moreover, while some programs are offered in English, having a basic understanding of Italian is beneficial, particularly for bachelor's programs. Finally, the costs range from 500 to 4000 euros per year, making it one of the most affordable countries for studying.

2

Spain

Spain boasts a rich architectural history, reflected in a variety of styles ranging from medieval to contemporary. Tuition fees are generally lower compared to the United Kingdom or the United States, and the cost of living in many Spanish cities is reasonable. This makes studying architecture in Spain accessible to a broad spectrum of international students.

3

UK

Studying architecture in the UK is a compelling choice due to its academic excellence. Tuition fees for international students range from £15,000 to £30,000 per year, however, the cultural exposure, global opportunities, and the international recognition of a UK degree make it an attractive investment for those pursuing a career in architecture.

OUR TOP PICKS - ARCHITECTURE PROGRAMMES EDITION

Here are our favorite architecture programmes!

Please note that this reflects only our opinion. It should not replace the need for research based on your own preferences.

1

Architectural Design - Politecnico di Milano

The program focuses on providing the necessary skills to design buildings and spaces, considering the challenges and changes our built environments face. This program covers everything from the basics to more detailed aspects of architectural design, ensuring graduates are well-prepared to create thoughtful and sustainable architectural solutions.

2

Architecture - Politecnico di Torino

This program prepares you to actively participate in the architectural design process at various levels, from idea development to execution and oversight. You'll gain critical analysis and problem-solving skills, making you a valuable asset in professional design studios, public administration, engineering and architecture firms, sector companies, and construction businesses.

3

Fundamentals of Architecture - Universitat Politècnica de Valencia

The Degree in Fundamentals of Architecture provide the basis, foundations and tools to train professionals capable of creating architectural projects that satisfy the aesthetic demands and the techniques and requirements of their users, within the limits imposed by budgetary factors and construction regulations.

OUR TOP PICKS - RELATED PROGRAMMES EDITION

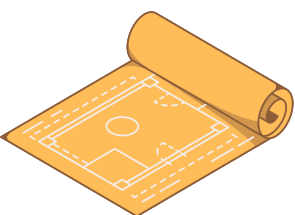

Here are some specific program recommendations related to the field of architecture with very interesting approaches. **Please note** that this reflects only our opinion. It should not replace the need for research based on your own preferences.

1

Construction Technology - VIA University College

At the 2 year Construction Technology study programme, you will learn to plan building projects and get a broad understanding of the various building stages. You will gain project management skills and experience in using digital tools in the construction process.

2

International Master of Landscape Architecture - The Oslo School of Architecture & Design

The aim of the programme is to train design-driven landscape architects who can operate globally, contributing to sustainable development across scales and geographies. The International Master of Landscape Architecture has twice received the prestigious "International Prize for Landscape Schools".

3

Programme in Wood Oriented Furniture Design - University of Gothenburg

The bachelor's programme in Wood-Oriented Furniture Design offer the chance to gain deep knowledge of material, techniques, and design methodology. You will explore wood as a material and its part and interaction with furniture, spaces, and our senses.

NO.1 TIP

Start preparing, revising, gathering documents, applying and studying for aptitude exams as early as possible. One of the biggest mistakes in architecture applications is undermining how much time it requires.

PORTFOLIO WARNING

Preparing a portfolio for your application to an architecture bachelor's degree is a crucial step in showcasing your skills, creativity, and potential. Key aspects to consider are: selection of work, quality over quantity, organization and presentation, and, finally include a statement.

PORTFOLIO EXTRA TIPS

3D Models and Physical Work: If applicable, include photographs or documentation of physical models you have created. This provides a tangible representation of your design thinking.

Personal Projects and Interests: Showcase any personal projects or endeavors related to architecture, as they can reveal your passion and commitment to the field.

DEADLINE TIMELINE

We have mapped out some of the most important deadlines to keep in mind for many of the universities mentioned in this Guide. **Please note** these dates are **indicative only** and **more steps may be required** to complete the application procedure.
